Introduction

This document sets forth the methodology for the IQ US Real Estate Small Cap Index (the “Index”). Capitalized terms are defined herein.

Index Objective

The IQ US Real Estate Small Cap Index is float adjusted market cap weighted and seeks to give investors a means of tracking the overall performance of small capitalization U.S. real estate companies.

Eligibility Requirements

Index Universe

The Index is comprised of common stock and may include Depositary Receipts (DRs) on eligible exchanges.

The components of the Index are listed for trading on the following eligible exchanges:

Exchange			
NYSE	NYSE Arca	NASDAQ	

Index components must have a minimum of 10 trading days history to be eligible for inclusion.

The full market capitalization is determined for the U.S. Real Estate Sector, with companies in the bottom 10 percent of the market capitalization defining the eligible small cap universe for the Index.

Once the eligible small cap universe is set, index components must meet the following minimum thresholds at the time of the quarterly rebalance date to be included in the Index:

- Minimum market capitalization of \$150 million
- Minimum average market capitalization of \$150 million for 90 days prior
- Minimum average daily trading volume of \$1 million for 90 days prior
- Minimum average daily volume of 250,000 shares over the six months prior

Selection Criteria

Companies meeting all eligibility requirements outlined above are selected for Index inclusion.

Existing index components must meet the following requirements at the time of the quarterly rebalance date to remain in the Index:

- Average market capitalization for the 90 days prior must fall below the cut-off

level set at 65% higher than the market cap ceiling of the small cap universe outlined above

- Minimum average market capitalization of \$100 million for 90 days prior

Index Construction

Weighting

Index component weights are determined using float adjusted market capitalization.

Concentration Limitations

At the time of the quarterly rebalance, no single component of the Index may have a weighting greater than 10% of the Index. To the extent one or more components would exceed this limitation, the cap is applied and the excess weight is allocated proportionately among the other Index components.

Index Shares

Shares held within the index are derived from float adjusted shares outstanding subject to the concentration limits as described above.

Index Maintenance

Reconstitution

The quarterly reconstitution of the Index is conducted on the second Friday of March, June, September and December and becomes effective at the open of the Monday following the third Friday of March, June, September and December.

Rebalance

Index rebalance coincides with the quarterly reconstitution as described above.

Corporate Events and Index Policy

Refer to the IndexIQ Events Guide.

Index Calculation

Index Level

The following general formula is used to calculate the Index Level:

$$\frac{\sum_{i=1}^n (P_i \times \text{Shares}_i)}{D}$$

P_i = Price of security i
 Shares_i = Shares of security i
 D = Divisor

Return Series

The Index return series is based on the treatment of cash dividends, stock dividends, and spin-offs (collectively determined as a “Distribution”).

- The Price Return (PR) index is calculated without adjustments for distributions.
- The Total Return (TR) index reinvests distributions as of the ex-date.

In the event there are no distributions the daily performance of both indexes will be identical.

Currency

The Index is calculated in U.S. Dollars.

APPENDIX 2: Disclaimers

Disclaimers

This document and the information included herein is proprietary to IndexIQ LLC and is protected by copyright and other intellectual property laws. The unauthorized copying, redistribution, sale, retransmission or other transfer to a third party of this data, without the prior written consent of IndexIQ LLC, is strictly prohibited.

Any use or exploitation of this document or the information included herein, for the purpose of creating any financial product or service which seeks to match the performance of the Indexes, or which otherwise is based on the Indexes, is not permitted unless a written license from IndexIQ LLC has been obtained.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. IndexIQ LLC does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. IndexIQ LLC makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. IndexIQ LLC makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. IndexIQ LLC is not a tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by IndexIQ LLC to buy, sell, or hold such security, nor is it considered to be investment advice. Closing prices for IndexIQ LLC's indices are calculated by the Calculation Agent based on the closing price of the individual constituents of the index as set by their primary exchange. Closing prices are received by the Calculation Agent from one of its third-party vendors and verified by comparing them with prices from an alternative vendor. The vendors receive the closing price from the primary exchanges. Real-time intraday prices are calculated similarly without a second verification.
